

Managed Internet Access

For Connectivity that is Business Critical

Spectrum Optic - Fully Managed Fibre Optic Leased Line

Premium Connectivity Solutions the Spectrum Way

Your internet connection is now the heartbeat of your business. Its pulse races through every fibre of your organisation – from the email orders you receive to your e-billing system. It crosses the different cities in which you work or collaborate with and the time zones that you call.

Support As You Need It

Fully personalised, hands-on account management which works for you, supported by an expert technical team with in-depth knowledge who are empowered to resolve your queries. There's no call centre to navigate through, just technical staff you'll get to know.

Reliability with Resilience at the Core

We've built a robust backbone using global carriers for transit and IX peering arrangements to guarantee low latency, minimum jitter and packet loss.

Experts in Migrating Services

Expect a smooth transition to Spectrum Internet with our dedicated team on hand even before your connection goes live.

Improved Communications Mean Increased Productivity

Enjoy exclusive use of your dedicated synchronous bandwidth at all times, with flexibility to scale up if your user demands change or your business grows.

Complete Reassurance

Proactively monitored with reassuring and stringent 99.9% service level agreements that are financially backed. Whilst we know SLAs are important, speed of response is critical to your organisation. With this in mind, from the second we are aware of an issue, we start work to get you back online and keep you there.

Key Information
